reach home loans

# People App

## How-To and Overview

Onboarding, Annual Compliance, offboarding, branches, and HR records for every Reach Home Loans employee, in one place inside Salesforce.

**Prepared for** Adam Stephens and Bianca Rodrigues
**Prepared by** Christopher Lowman

**October 2026**
Internal: People admins only

15. Quick reference

## 1. What People is, and who can use it

People replaces the onboarding spreadsheet. Every employee has one permanent record, and that record carries checklists for each stage of employment:

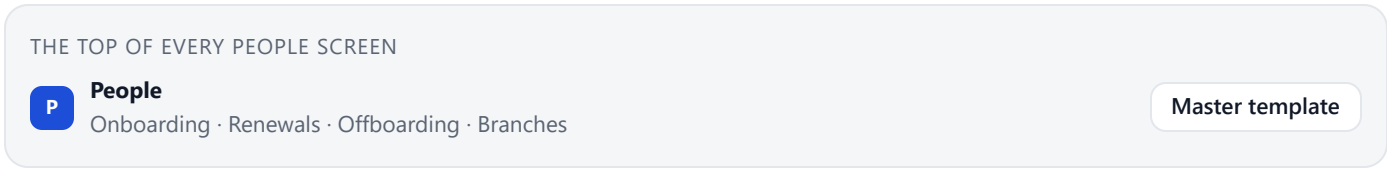

| Checklist | What it covers | Due dates count from |
|---|---|---|
| **Onboarding** | The 53-step new-hire list: pre-start, Day 1, Week 1, 30 and 90 days | The start date |
| **Annual Compliance** | License renewals per state, NMLS CE, BSA/AML, Fair Lending, GLBA privacy, IT security, handbook | December 31 of the year |
| **Offboarding** | Resignation paperwork through equipment return, access shutdown, NMLS removal and COBRA | The last day |
| **Branch** | Opening a new branch: approval, licensing, setup and launch | The target open date |

Every task records **who completed it and when**. A finished checklist is signed off, which locks it and files a regulator-format PDF. That's the record examiners ask for.

> **Access:** only **Christopher Lowman, Bianca Rodrigues and Adam Stephens** can open People. Access comes from the *People Admin* permission set. Nobody else sees the tab, the records or the HR data. Employees don't need a Salesforce login to be managed in People.

## 2. Opening People in Salesforce

1. Click the **App Launcher** (the 9-dot grid at the top left of Salesforce).
2. Type **People** and choose the **People** app. Or open the People tab directly at `reachhomeloans.lightning.force.com/lightning/n/People`
3. *Optional:* to add People to an app you already use, click the pencil at the right end of that app's navigation bar, then **Add More Items**, search for **People**, add it and save.

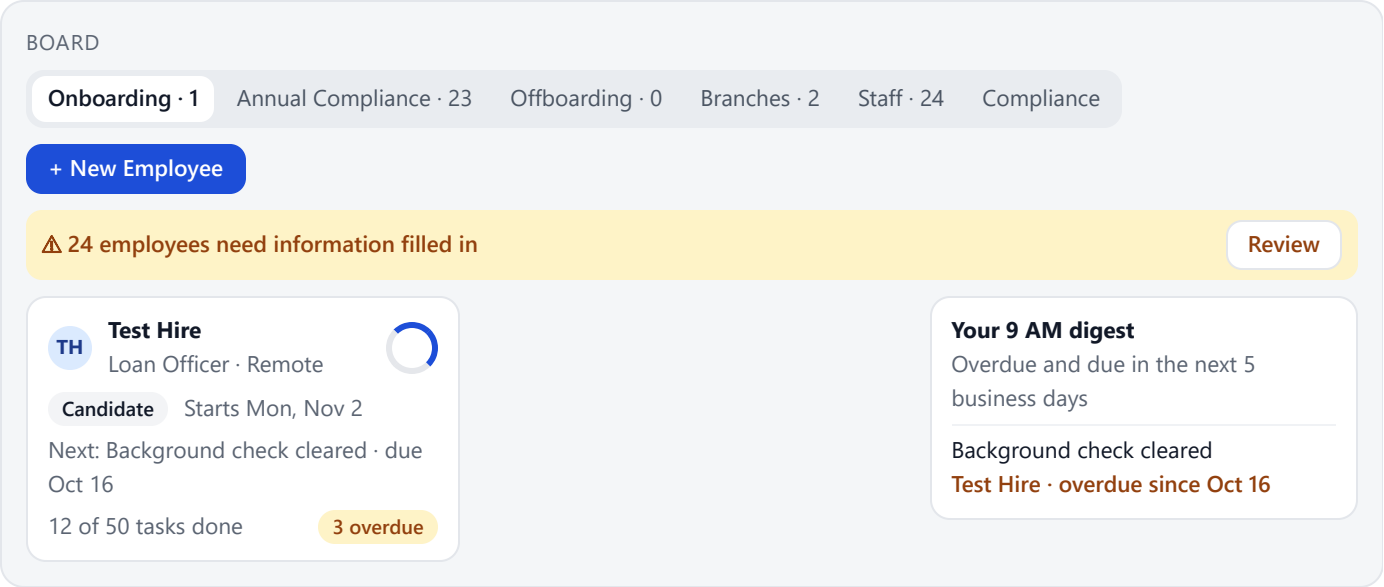

**Master template** (top right) opens the template editor (section 13). On the template screen it changes to **Back to board**.

If People doesn't appear for Adam or Bianca, refresh the browser or sign out and back in once.

## 3. The board at a glance

The board is the home screen. The tabs across the top filter what you see:

| Tab | What it shows | Button |
|---|---|---|
| Onboarding | A card for every open onboarding checklist | + New Employee |
| Annual Compliance | A card per employee for this year's Annual Compliance | Open {year} Annual Compliance (only if someone still needs one) |
| Offboarding | A card per employee being offboarded | None (start from an employee page) |
| Branches | Every branch: status, manager, target open date, checklist progress | + New Branch |
| Staff | Everyone who works here, with role, status, start date, manager, NMLS and states | + Add existing employee |
| Compliance | The examiner view: grid, expiring licenses, missing information | Export CSV |

### Reading a card

- **The ring** shows the percentage of tasks done. **The pill** shows status (Candidate, Pre-Start, Active, Offboarding).
- **Next:** the next open task and its due date. **Overdue** (amber) counts tasks past their due date.
- Click a card to open that person's page with that checklist showing.

### The digest panel and the missing-info banner

- **Digest panel:** *your* open tasks that are overdue or due in the next 5 business days, across all checklists. Click a line to jump to that person.
- **Amber banner:** counts employees with required information missing. **Review** opens the list on the Compliance tab.

Digest and reminder **emails are paused** for now. The panel on the board still shows what's due.

## 4. Onboarding a new hire

1. On the **Onboarding** tab, click **+ New Employee**.
2. Fill in the form. **First name, last name, role, work arrangement and start date are required.** The rest can be added later:

| Field | Notes |
|---|---|
| Role | Loan Officer, Branch Manager, Processor, Closer, Opener, Operations/Admin, Manager. Sets which tasks apply. |
| Work arrangement | In-Office, Remote, Hybrid. VPN only for Remote/Hybrid; desk and business cards only for In-Office. |
| Start date | Every due date is calculated from this. |
| Title, department, employment type, schedule, hire date | HR details (section 5). |
| Branch, manager, emails, NMLS ID | Personal email is where the onboarding emails go. |
| Licensed states | Creates a *Pending* license for each state (section 7). |

3. Before you save, the blue box previews the result. For example: "*50 tasks will be generated for a Loan Officer (Remote), plus 1 optional to add. First task due Mon, Nov 9.*"
4. Click **Create and generate tasks**. The employee page opens with the checklist ready.

### How due dates are worked out

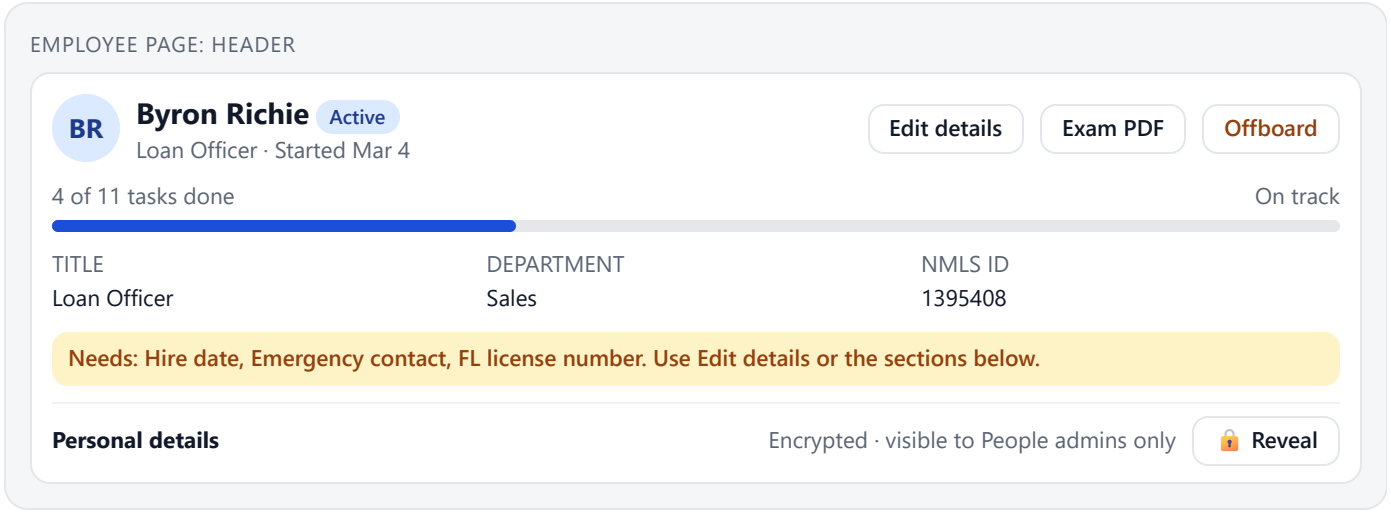

- Most tasks count **business days** from the start date and skip weekends and company holidays. For example, "−14" means 14 business days before Day 1.
- The **benefits deadline, 30-day check-in, scheduling the 90-day, and the 90-day check-in** count **calendar days**. If one lands on a weekend or holiday it moves to the next business day.
- **Moving the start date** (Edit details) re-dates every open task. Completed tasks keep their dates, and you're warned if any open task now falls in the past.

### Status moves on its own

**Candidate** → **Pre-Start** when "Collect background check info" (PH-4) is done → **Active** on the start date (overnight job) → **Offboarding** → **Terminated** when the offboarding checklist is signed off. **Withdraw** (employee page) is for a candidate who backs out or fails the background check: open tasks become N/A and the history is kept.

## 5. The employee page

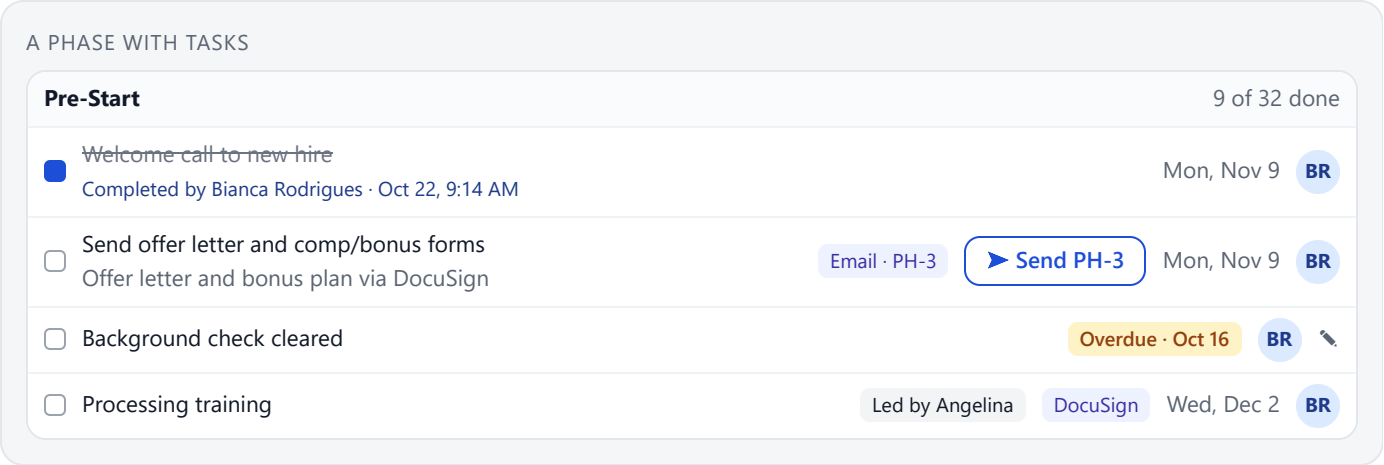

Click any card, Staff row or Compliance row to open the employee page. From top to bottom:

| Part | What it does |
|---|---|
| **Edit details** | Changes name, role, arrangement, start date, title, department, employment type, schedule, hire date, branch, manager, emails and NMLS ID. Moving the start or last day re-dates open tasks. |
| **Exam PDF** | Previews the regulator-format PDF of the checklist on screen. It's marked DRAFT until signed off. |
| **Offboard** | Starts offboarding (section 9). |
| **Withdraw** | Onboarding only. Closes a candidate's checklist. |
| **Facts** | Title, department, employment, work anniversary, manager, branch, NMLS ID, licensed states, emails, linked Salesforce user, last day. |
| **Needs banner** | Exactly what's missing for this person: hire date, department, employment type, emergency contact, and for licensed staff each license's number and expiration. |
| **Personal details** | Date of birth, home address, personal phone, emergency contact. Stored encrypted; click **Reveal** to view or edit, then **Save**. No SSN is ever stored. |
| **Licenses / Compensation** | See section 7. |
| **Checklist switcher** | Appears when the person has more than one checklist, e.g. *Onboarding · Annual Compliance 2026 · Offboarding*. Click to switch. |

## 6. Working a checklist: tasks, emails, sign-off

Tasks are grouped by phase (Pre-Start, Day 1, Week 1, 30 Days, 90 Days, and the equivalent phases for the other checklist types). Filter with **All · Mine · Open**.

### Completing, editing and adding tasks

- **Tick the box** to complete a task. It's stamped with your name and the time. Unticking reopens it, until the checklist is signed off.
- **Pencil (✎)**: change the assignee (Chris, Bianca or Adam), the due date or notes, or **Mark N/A** if the task doesn't apply.
- **Chips:** *Led by* shows who actually runs the task (e.g. Angelina), *DocuSign* means it's sent through DocuSign, *To:* shows the recipient, and *Email reminder* marks a task that sends reminders when emails are on.
- **Optional items:** tasks that only apply sometimes (e.g. FHA Connection ID). Click **Add to checklist** when needed.
- **Add a one-off task:** a task for this person only, with subject, phase, due date and assignee.

### Sending the onboarding emails (PH-3, PH-4, PH-7, PH-8)

1. Click **Send PH-x** on the task. A preview opens, already filled in with the hire's name, NMLS ID and the Paychex "2 business days" date.
2. Check or edit the To, Subject and message. The email ends with **your own signature card** (new logo, headshot, title).
3. Click **Send**. It goes from **your** email address, the task is marked done, and a note records who it went to and when.

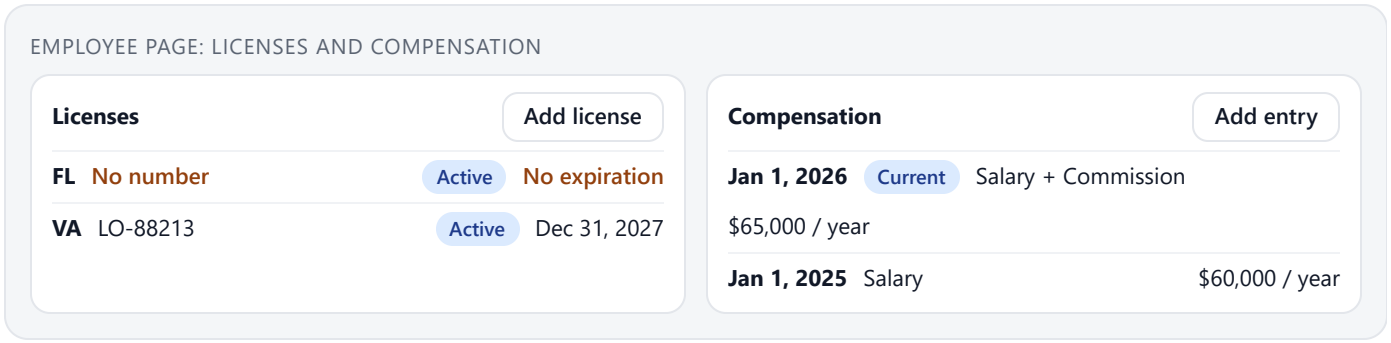

PH-6, PH-9, PH-10, Day 1 Instructions and Team Announcement go through DocuSign, so tick those tasks by hand once sent. The template wording can be edited in Setup → Classic Email Templates → folder *People Onboarding*.

### Compliance sign-off and the exam PDF

- When every task is done or N/A, **Sign off** unlocks for Bianca, with Chris as backup. You confirm the attestation: "*I attest that every item on this checklist was completed as recorded.*"

- Signing off **locks the checklist** and **files the exam PDF** on the employee's record: header, items grouped Regulatory / Systems / Documentation, completed-by and date for each, and the sign-off block. **Open filed PDF** opens it.

# 7. Licenses and compensation

### Licenses: one per state

- **Add license** or click a license to edit its state, license number, status (Active / Pending / Inactive / Expired), sponsorship (Sponsored / Pending / Removed), issue date, expiration date and last renewed date.
- The person's **Licensed States** are worked out from their Active and Pending licenses and copied to their Salesforce user, which LO Workspace and signature cards use. You don't type states anywhere else.
- When someone stops holding a state, set it to **Inactive** rather than deleting it.
- Ticking "*Confirm {state} renewal approved*" in Annual Compliance marks that license **renewed today, valid through December 31 next year**.
- The **NMLS ID** is kept on the employee record (Edit details) and copied to their Salesforce user.

All 32 current licenses were created without numbers or expiration dates, so licensed staff appear under **Missing information** until Bianca fills them in.

### Compensation: dated history

- **Add entry** for each pay change: effective date and pay type (required), base amount per year or hour, LO comp in bps, a per-loan flat amount, bonus plan and notes.
- The newest entry is marked **Current**. For a raise, add a new entry rather than editing the old one, so the history stays intact. Delete only mistakes.
- Only the three People admins can see compensation in People. Full Salesforce System Administrators can technically read it as well.

## 8. Annual Compliance

Every **October 15**, People opens an **Annual Compliance {year}** checklist for every Active and Pre-Start employee. Use the **Open {year} Annual Compliance** button on that tab to open them early, or for anyone who doesn't have one yet. Running it twice never creates duplicates.

| Item | Who gets it | Due |
|---|---|---|
| Complete NMLS annual CE (8 hours) | Anyone with an NMLS ID | Nov 16 |
| Submit {state} license renewal in NMLS | One per licensed state | Dec 1 |
| Confirm {state} renewal approved in NMLS | One per licensed state; renews the license record | Dec 31 |
| BSA/AML refresher (OnCourse) | Everyone | Dec 1 |
| Fair Lending training | Everyone | Dec 1 |
| GLBA privacy training | Everyone | Dec 1 |
| IT security training | Everyone | Dec 1 |
| Employee handbook re-acknowledgment | Everyone | Dec 1 |
| Update NMLS individual record (MU4) | Optional: add it when something changed | Nov 16 |

- **Licensing follows the NMLS ID, not the job title.** A President or Manager with an NMLS ID gets the license tasks too. Brandon, for example, has one pair of tasks for each of his 13 states.
- Paste the certificate's OneDrive link into the task's notes when you tick it.
- Sign off each person's checklist when it's complete. The signed PDF is the renewal record for examiners.

## 9. Offboarding

1. Open the employee (from Staff), click **Offboard**, and enter the **last day** and reason (Resigned / Terminated / Other).

2. Their status becomes **Offboarding** and a 13-task checklist is dated from the last day:

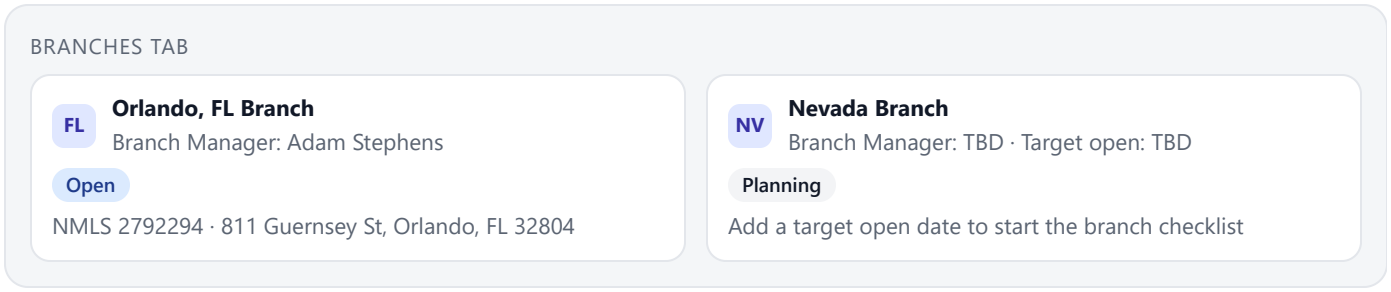

| Phase | Tasks |
|---|---|
| Before last day | Resignation letter or separation agreement · notice of termination filed · **reassign open Leads and Transactions** · FedEx return slip (remote/hybrid) |
| Last day | Equipment and keys · **deactivate Salesforce user** · disable ARIVE, Encompass, UWM/EASE, Advantage, CIC, RingCentral, GoHighLevel, Trainual, DocuSign · **KB Technologies Outlook / M365 shutdown** · final pay in Paychex |
| After last day | Remove from NMLS (licensed) · remove from Teams and distribution lists · COBRA paperwork · confirm equipment received |

3. An amber line on their page shows what they still have: "*To hand over: 4 open Leads owned and 2 active Transactions as Loan Officer.*"

4. Sign off the offboarding checklist when it's complete. The employee becomes **Terminated**, and their history stays on file.

## 10. Branches

This is the first time branch information is stored in Salesforce; until now, branch was only a dropdown on Leads and Transactions. The **Branches** tab lists every branch:

- **+ New Branch** or **Edit details** on a branch: name, state, status (Planning / Licensing / Open / Closed), target open date, branch NMLS ID, branch manager, address.
- **The branch checklist starts once a target open date is set.** That's 31 tasks across Approval, Licensing (including the state branch license, e.g. Nevada's Division of Mortgage Lending, and NMLS branch sponsorship), Setup and Launch. Moving the date re-dates open tasks.
- Established branches like Orlando don't need a checklist: leave the target open date empty.
- Each person's onboarding for a new branch stays on their own checklist. The branch checklist includes a step to add them in People.

## 11. Staff and adding existing employees

The **Staff** tab lists everyone who works here: name, role, status, start date, manager, NMLS ID and states. Rows with an Needs info marker are missing required information. Click any row to open the person.

### Adding someone who already works here

Many employees don't use Salesforce. To add one:

1. On **Staff**, click **+ Add existing employee**.
2. Enter first and last name and role (required), plus title, department, employment type, schedule, hire date, branch, manager, emails, NMLS ID and licensed states.
3. **Salesforce user** is optional. Leave it empty for people without a login.
4. Click **Add employee**. They're created Active, with **no onboarding checklist** and an Active license for each state. During renewal season their Annual Compliance opens straight away.

When a Salesforce user is created later with the same email as someone's **work email**, People links them automatically and ticks "Set up Salesforce user".

## 12. The Compliance tab

The view for examiners, renewals season and housekeeping:

COMPLIANCE TAB: ANNUAL COMPLIANCE GRID

| Employee | NMLS CE | Submit renewal | Confirm approved | BSA/AML | Fair Lending | IT security |
|---|---|---|---|---|---|---|
| **Brandon Brotsky** Manager | Open | CA, CO, FL… | CA, CO, FL… | Done | Open | Overdue |
| **Bianca Rodrigues** Operations/Admin | — | — | — | Done | Done | Open |

- **Grid:** one row per person, one column per Annual Compliance item: Done Open Overdue, or "—" for not applicable. License columns list each state, with ✓ once done.
- **Licenses expiring within 60 days**, soonest first.
- **Missing information:** everyone with gaps, and exactly which fields. This is where the board banner's **Review** button leads.
- **Export CSV** (top right) downloads the grid to give to an examiner.

## 13. Master templates

**Master template** (top right) holds the master task list for each checklist type: **Onboarding · Annual Compliance · Offboarding · Branch**. Any of the three admins can change them.

- **Reorder** by dragging rows, or with the ↑ ↓ arrows. **+ New task** adds one, and the pencil edits one.
- **Changes apply to checklists created from now on.** Existing checklists keep their tasks; add a one-off task to them if needed.

| Template setting | Meaning |
|---|---|
| Subject, description, phase | What the task says and where it appears |
| Offset + Offset counts | Days from the anchor date (negative = before), in business or calendar days |
| Default assignee / Led by | Who owns the task (Chris, Bianca or Adam) and who actually performs it |
| Roles, work arrangements | Who gets the task. Leave blank for everyone. |
| Optional | Offered as "Add to checklist" instead of created automatically |
| Email template, Send to, Sent via DocuSign | Shows the Send button (PH-3/4/7/8), the recipient, or the DocuSign chip |
| Exam section | The section of the exam PDF it appears under: Regulatory, Systems or Documentation |
| Completing it moves a Candidate to | Pre-Start (set on PH-4) |
| Complete automatically when | "Salesforce user linked" (set on "Set up Salesforce user") |
| One per licensed state | Annual Compliance only; *{STATE}* in the subject becomes the state code |
| Email reminder | Reminder 7 days before and on the due date (while emails are on) |
| Active | Turn off instead of deleting |

## 14. What happens automatically

| When | People does this |
|---|---|
| Every morning (9 AM job) | Moves Candidates and Pre-Starts to **Active** on their start date; links Salesforce users; syncs NMLS ID and states to users |
| Every October 15 | Opens Annual Compliance for the year |
| A Salesforce user is created (or their email changes) | Links them to the People employee with that work email; ticks "Set up Salesforce user" |
| PH-4 task completed | Candidate → Pre-Start |
| Offboarding signed off | Employee → Terminated |
| "Confirm {state} renewal approved" ticked | License renewed; expires Dec 31 next year |
| Digest and reminder emails | **Paused.** They can be switched back on whenever wanted |

## 15. Quick reference

| I want to... | Go to |
|---|---|
| Start onboarding a new hire | Onboarding tab → + New Employee |
| Add someone already employed | Staff tab → + Add existing employee |
| Send an onboarding email | Employee page → task → Send PH-x |
| Record a pay change | Employee page → Compensation → Add entry |
| Add or renew a license | Employee page → Licenses → Add license / click a license |
| See what's overdue for exams | Compliance tab (Export CSV for an examiner) |
| Fill in missing information | Board banner → Review, or the Needs line on the employee page |
| Offboard someone | Staff → employee → Offboard |
| Plan a new branch | Branches tab → + New Branch (set a target open date) |
| Change the standard task lists | Master template (top right) |
| Get the signed record for an examiner | Employee page → Open filed PDF (after sign-off) |

### Good to know

- **Documents stay in OneDrive.** People stores status, dates and links, not files. The only file People creates is the signed exam PDF.
- **No SSNs.** HireRight and Paychex hold them.

- **Encrypted personal details** need Reveal. Only the three People admins can view them.
- Questions or changes: Christopher Lowman.

People app, Reach Home Loans LLC (NMLS# 2266637). Internal use only.
